Next.js
React Native

If you use a different prototyping tool that works well in your established workflow, I would be happy to learn it.

Experience

Product Designer

Contract — November 2020 - Present

- Ideate, produce, and present project deliverables such as user flow, wireframes, and concept designs.
- Apply interactive and visual design principles on websites and web applications for a positive and cohesive user experience.
- Contribute to solving design challenges based on the functional requirements of the media.
- Successfully deliver products for 4 clients over 15 months.

Product Design Intern

British Columbia Institute of Technology — September 2021 - December 2021

- Leverage personas to prioritize the feature roadmap, and empowered product designers and developers to write customer-centric user stories.
- Perform Testing on different platforms (desktop, tablet, mobile) for User Acceptance Testing and deliver results prior to launch.
- Work with 6 teammates to deliver the project within 4 months.
- Won Impact Award for solution with the most potential to advance knowledge on mental health literacy.

UX Designer

Nexus Mods — September 2017 - May 2021

- Improved Stardew Valley to make the experience more enjoyable to community of users.
- Work within existing systems and expanded them, including integrating feedback from UX testing.
- Received over 1,100 downloads for one of the mods and positive feedbacks for all mods.

Game Development Club Representative

Simon Fraser Student Society — September 2018 - August 2020

- Taught over 250 students and professionals UX/UI design in 2020.
- Organized a Gaming Hackathon at Simon Fraser University.
- Led a two day workshop with 200 participants at Simon Fraser University on crafting better gameplay experiences.
